

NOTEPAD - Standard

*Finished Product Size:
4.25" wide and 5.5" high*

*Your Print Ready File Size should be
4.50" xwide and 5.75" high*

BLEED - Your file needs to include a 0.125" bleed necessary for production.

Bleed is printing that goes beyond the edge of the sheet after trimming. If a bleed is not included in document setup, there is a good chance that there will be a gap between the edge of the printed area and the cut line. This happens because there is a tolerance when cutting the printed piece.

SAFE MARGIN - Your file needs to include a 0.125" safe margin necessary for production.

Safe margin is the area around the edge of the sheet. If the safe margin is not included in document setup, there is a chance that the art close to the edge will get cut off due to machine shift during cutting. This happens because there is a tolerance when cutting the printed piece.
