**SAFE MARGIN:** Your file needs to include a 0.125-.25" safe margin necessary for production. Safe margin is the area around the edge of the sheet. If the safe margin is not included in document setup, there is a chance that the art close to the edge will get cut off, due to machine shift during cutting. This happens because there is a tolerance when cutting the printed piece.

**CUT LINE (FINISHED SIZE):** This is where your artwork will be trimmed.

**BLEED:** Your file needs to include a 0.125" bleed necessary for production. Bleed is printing that goes beyond the edge of the sheet after trimming. If a bleed is not included in document setup, there is a good chance there will be a gap between the edge of the printed area and the cut line. This happens because there is a tolerance when cutting the printed piece.

**FOLD LOCATIONS:** For Your Reference Only Not required will be generated with this file output

*GateFold 34"x 11" Landscape 8 Pages*

*Flat Size: 33.75" W x 11" H*

**Your Submitted/Output File One  
Single Two Page File  
Each Page Size 34"x11.25"  
(includes the .125" bleed)**

**No Registration Marks  
No Bleed or Trim Marks  
No Color Bars**

**NOTE: TURN OFF LAYER "FOLDING GUIDES" BEFORE PRINTING**
